Education

Kalasalingam Academy of Research and Education

2022 – present

Electronics And Communication Engineering CGPA:8.94

Madurai, India

SKILLS SUMMARY

- * Python Web Development: Strong experience in Python-based application development, Flask web frameworks, and front-end technologies (HTML, CSS, JavaScript) for building scalable and user-friendly systems.
- * AI, Machine Learning GenAI: Hands-on expertise in Machine Learning, Deep Learning, Generative AI, LLMs, and predictive analytics, with real-world projects in health monitoring, predictive maintenance, and load balancing.
- * Tools, Platforms Soft Skills: Proficient with VS Code, Jupyter, APIs, and full-stack platforms, complemented by strong communication, leadership, teamwork, and problem-solving abilities for effective product development.

Experience

Suven Consultants & Technology Pvt. Ltd.

2024/06 – 2024/07

Machine Learning and Deep Learning Intern

India

- * Gained hands-on experience in data analysis and visualization using Python-based analytical tools.
- * Developed machine learning models with a focus on fraud detection and predictive analytics.
- * Strengthened foundations in Python, Machine Learning, and Deep Learning while working on real-world datasets and problem statements.

Projects

AI-Driven Predictive Maintenance System and Cost Optimization | LSTM,IoT

2025/07 – present

- * AI IoT-driven Predictive Maintenance Developer with hands-on experience building real-time industrial monitoring systems using machine learning models such as Random Forest, XGBoost, and LSTM.
- * Designed an IoT-enabled cloud architecture to analyze sensor parameters like temperature, pressure, vibration, and electrical signals for early fault prediction, anomaly detection, and maintenance scheduling.
- * Reduced downtime by 60–70%, lowered maintenance costs by 30–40%, achieved 0.99 AUC in fault prediction accuracy, and delivered real-time IoT monitoring with automated, cost-aware decision-making.

Multidimensional modelling for sustainable urban plannin | TABULE,POWER BI

2023/12 – 2024/02

- * Uses data analysis tools to visualize urban development, optimize resources, and support decisions through interactive dashboards.
- * This helps for demand and supply required elements and productive optimized way of analyzing the data which helps to make the work 2x times faster.

Climate Change Analysis | Machine Learning

2023/08 – 2023/10

- * Machine learning-based system that analyzes climate data to predict patterns and support climate adaptation and mitigation efforts
- * Performed climate data analysis and pattern recognition using modern predictive techniques. Implemented LSTM for time-series forecasting and XGBoost and CatBoost for accuracy optimization, enabling real-time data tracking and faster analytical insights. Incorporated deep learning concepts for weather and climate change prediction, achieving an overall accuracy of 95%.

Technical Skills

Languages: Python, C, Java, JavaScript, HTML, CSS, SQL

Developer Tools: VS Code, Eclipse, Jupyter Notebook, Android Studio, Google Cloud Platform

Technologies/Frameworks: Flask, Git, GitHub, Linux, Machine Learning, Deep Learning, Generative AI

Certificates

- * Building app using Ai tools 2025
- * IEEE sustainable Solutions for Humanity 2024
- * Chat GPT and AI Hacks 2024
